4,000 EWES

2024 Cashmore Oaklea November Ewe & Lamb Sale

Thursday 7th November
12 Noon - Auctions Plus

With the continuing move to self replacing prime lamb systems, Cashmore Oaklea and our clients are pleased to offer over 4000 of these purpose bred ewes to the market for the November 7th sale via Auctions Plus. Sired by top 10% performance recorded rams for high growth and outstanding fertility, these sound, moderate framed ewes offer great opportunity for establishing new flocks or for use as prime lamb dams. The flexibility of self-replacing lamb systems is becoming increasingly important as an alternative to purchasing high priced replacements annually. Whilst the past year has been an uncertain time for many sheep farmers in terms of the season and lamb prices, we are confident that the industry is moving in the right direction and believe that offering of ewe lambs and mature ewes this year will be a great opportunity for farmers that are establishing new flocks or expanding upon their current enterprises. The following information offers some background about the vendors and ewes in the sale and will assist your selections.

All the best with your purchases.

SALE VENDORS

Don Pegler & Lyon Family, Oaklea Trust, Mt Gambier, SA

Don Pegler and Lyon family farm south of Mt Gambier right on the coast with free draining limestone and flint based soils, but are prone to very wet and windy conditions during lambing. Their commercial maternal wether lambs are sold as suckers at heavy trade weights through the Mt Gambier saleyards with the sister portion offered each year in the Cashmore Oaklea ewe sale.

These are June/July drop giving clients a little more weight and age and allowing an earlier mating from these well grown ewe lambs. These lambs are all bred from sound CFA ex stud ewes that have been pushed from the flock by higher performing daughters. An entire drop of ex Stud ewes is also offered.

Josh Lilley, Carnham, VIC

Josh and Mel Lilley farm 12km north of Portfairy VIC, running self replacing material composites and cashmore nudies flocks in a wet invoirement with a high stocking rate.

We have been purchasing Cashmore Oaklea rams for the past 6 years, selecting rams in the top 3% band for EBVs and have regularly been scanning 170-180% for a end of June / July lambing and are very happy with their hardiness and performance.

With excess numbers we will offer pure nudie ewes lambs.

John & Dallas Connell, Bradvale, VIC

We have a surplus in our young ewes of Cashmore Park composites. We've used Cashmore genetics exclusively for 15 years and run a highly productive flock concentrating on ease of lambing and high reproduction rates.

Penstock Pastoral, Acheron, VIC

Penstock Pastoral run a self-replacing ewe flock of around 5000 Cashmore Oaklea ewes in the Upper Goulburn Valley and the Eastern Riverina across two high rainfall properties. Our main focus has been on fertility and lamb survival rates which had the flock mark 152% lambs to ewes joined in season 2023 . The longer term average lambing percentage is around 143% since starting on Cashmore genetics in 2014. Lambs are predominantly sold over the hooks direct to repeat buying processors after a July lambing.

James & Sarah Bull, Morgiana, VIC

James & Sarah have been running a small nudie flock since 2017 at Morgiana, south west of Hamilton. The flock was founded on Cashmore Nudie ex stud ewes, with top performing rams purchased annually with a focus on shedding, fertility and performance in wet conditions. The ewes have been managed with minimal inputs to develop a productive, easy care and resilient flock. Ewes are joined from mid-January, lamb easily and have shown outstanding lamb survival rates. The mature ewes are marking 140% with improving lamb weaning weights. Most lambs are sold at trade weight in early December.

Less than 10% of the ewes require any level shearing or crutching.

SELF REPLACING EWES - 2,740 MATERNALS, 1320 NUDIES

Australia's leading Maternal Composite flock and long term clients are please to offer our annual surplus females. Sired by top 10% performance recorded rams for high growth and outstanding fertility these sound, moderate framed ewes offer great opportunity for establishing new flocks or use as prime lamb dams. The flexibility of self replacing lamb systems is becoming increasingly important as an alternative to purchasing high priced replacements annually.
